**Utilities:** No

**Red Cross:** No

**Displaced Persons:** No

### CURRENT SITUATION

*(Recent updates are posted at the top of Current Situation)*

The City of Riverside Fire Department responded to a report of a commercial Structure fire in a fast food restaurant in the 9000 block of Arlington Ave. The first arriving Engine Company reported light smoke within the restaurant. As firefighters approached the front entrance, they observed flames coming from the kitchen area. Firefighters extended an attack hose line to the area of the fire but determined that the fire was burning cooking oil. Firefighters used a fire extinguisher designed for extinguishing vegetable oils fires to extinguish the flames. The restaurant was ventilated and firefighters checked the attic for fire extension. The deep fryer and part of the ceiling around the fryer suffered fire and smoke damage. The restaurant had to be closed until repairs to the kitchen and fryer could be completed. At the time of the incident, there was no estimate as to when the restaurant would reopen. There were no civilian or firefighter injuries during the incident.
